INFORMATION & INSTRUCTIONS FOR USE

Thank you for choosing Waterfall Audio speakers. Our deliberate choice for aesthetics and performance constantly guides us towards cutting-edge technologies and design combined with major innovations.

MUST BE CONSULTED BEFORE USE.

TO BE KEPT AND PASSED ON IN THE EVENT OF RESALE.

Warning : The speaker you have in your possession is equipped with glass panels. Any impact on the product can irreparably damage it. This product is fragile and must be used with "common sense", take this into account when unpacking, installing and throughout the life of the product. These speakers are designed for domestic use only. Use outdoors and in public places is prohibited.

UNPACKING AND REPACKING

Unpack and repack your speakers with the help of another person.

STEP 1

Remove the protective foam.

STEP 2

Remove the speaker cover.

Be careful, fragile speaker.

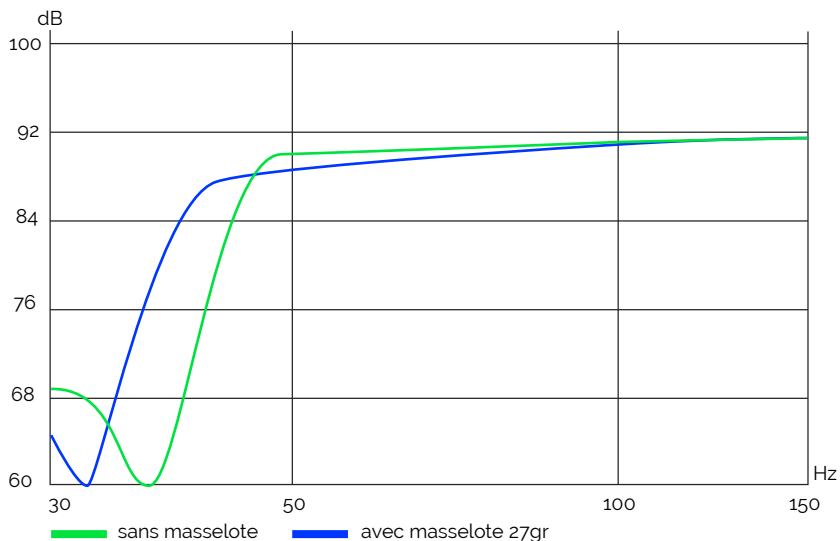

STEP 3

Still with 2 people, lift the speaker at the same time. **Be careful not to collide the speakers.**

LOW FREQUENCY ADJUSTMENT

Your speakers are equipped in their base with a passive subwoofer. You can adjust the low frequency response by tightening the 27 gram mass. The acoustic characteristics will be as follows:

Your speakers are delivered with removable covers. They are installed by "clipping" them onto the speaker.

CONNECTION

Connect directly the speaker to your amplifier or audio video processor. Make sure that the + and - polarity are correct. **Never connect two speakers in parallel (or in series) on the same channel. Never connect your speakers to the mains.** The "Waterfall Audio" cable is made from very high quality deoxygenated copper that is particularly well suited to your speakers. It is available from your dealer.

PLACEMENT

These speakers are designed to be placed on the floor exclusively. Be careful not to place them in a busy area. Be sure to position your speakers on a perfectly flat floor. If necessary, the bases are equipped with 4 M8 threaded holes, your dealer will be able to provide you with suitable points. If possible, place the speakers so that they diffuse in the direction of the length of the room. Placement in the corners will favor the emphasis on low frequencies and moving away from the walls will have the effect of favoring the sound image. Each room configuration being particular, we advise you to carry out a few tests to find the best possible compromise.

CLEANING

To clean your speakers you can use a window cleaner (Ajax window cleaner is ideal) with a soft, lint-free cloth. Never use abrasive products: jex pad, sandpaper, etc.

WARRANTY

Waterfall speakers have a 5 years warranty (parts & service) except amplifiers. Waterfall amplifiers have a 2 years warranty (parts & service). Check more on www.waterfallaudio.com (warranty section).

IN THE EVENT OF RESALE THE PRESENT THE DOCUMENT HAS TO BE INCLUDED WITH THE PRODUCT

WATERFALL AUDIO

ZA les praderies - 83 570 Carcès - France
